ABOUT US

Owing to the conservative work culture of the Japanese companies, Eiki Shigeta, the founder of JETconnect, felt the need to use his expertise and years of experience to help railway companies across the globe. As a result, Jet Connect was born in 2014 in Tokyo, Japan.

VISION

To use our years of experience in pioneer Japanese railway companies and a strong network of affiliations across the globe to provide innovative solutions that help you achieve operational efficiency and long-term sustainability.

LESS IS MORE

MISSION

We believe that an expensive solution is not necessarily the best. Especially when dealing with mega projects like railways, cost often skyrockets accompanied by delayed deadlines which is why the best solution should be effective not only functionally but also financially.

At JETconnect, we have the core competence and skills to handle complex project management problems and provide excellent management consulting.
